Maverick Telecom Loyalty Program — Two-Week Launch Plan

Prepared 20 July 2026 · Target launch: within 10 working days

Where We Are Today

- Core product is built and tested: points, 4-tier system, receipt scanning, rewards, redemptions
- Dual sign-in live: email + password and SA mobile (+27)
- Admin dashboard complete with role-based access and full audit log (with undo)
- Security hardened: encrypted passwords, rate limiting, CSRF protection, secure sessions
- POPIA-aligned Privacy Policy & Terms of Service drafted and linked from every page
- Sign-up consent recorded per user with timestamp and policy version
- Help & FAQ page live with search and 21 answered questions

Week 1 · Days 1–2 — Close Open Technical Items

- Create the Maverick super-admin account (Loyalty@mavericktelecom.co.za)
- Wire up SendGrid so verification codes, password resets and welcome emails send for real
- Replace placeholder contact details: support email, support phone, privacy@/legal@ addresses

Dependency: SendGrid API key and super-admin password from Maverick

Week 1 · Days 3–5 — Legal Submission & Regression Pass

- Days 3–4: Export Privacy Policy and Terms to PDF; submit to Maverick's lawyers with cover letter
- Days 3–4: Add one-time 'Accept Terms' popup for phone sign-ins (email path already covered)
- Day 5: Full end-to-end test — register !' verify !' upload receipt !' earn points !' redeem
- Day 5: Admin dashboard test — user management, audit log, undo, analytics
- Day 5: Mobile walkthrough on a real phone

The legal pack must go out this week — lawyer turnaround gates Week 2

Week 2 — Legal Feedback, Publish, Go Live

- Days 6–8: Apply lawyer feedback to policies; bump terms version for re-acceptance
- Day 9: Publish to production (database schema applies automatically)
- Day 9: Verify live URL — sign-up, sign-in, receipt upload, admin login
- Day 9: Connect custom domain if desired (e.g. `loyalty.mavericktelecom.co.za`)
- Day 10: Test deployed app end-to-end as a brand-new customer
- Day 10: Confirm real emails arrive; hand over super-admin credentials and admin guide

What We Need From Maverick

- Super-admin password (account creation is otherwise ready to go)
- SendGrid account + API key (free tier is fine to start)
- Real contact details: support email, support phone, Information Officer name
- Legal pack sent to lawyers in Week 1 — the only external dependency

Risks & Fallback

- Main risk: lawyer turnaround
- Everything else is within our control and fits comfortably in two weeks
- Fallback: launch with current POPIA-aligned drafts; when final legal wording lands, bump the terms version and users re-accept on next sign-in
- No data or feature risk — the platform is feature-complete and regression-tested before publish

Timeline at a Glance

- Days 1–2: Super-admin, SendGrid email, real contact details
- Days 3–4: Legal pack submitted · phone-consent popup
- Day 5: Full regression pass (web + mobile + admin)
- Days 6–8: Lawyer feedback applied, terms version bumped
- Day 9: Publish to production · domain connected
- Day 10: Live verification · handover · LAUNCH
