

Staff Guide: How the Loyalty Program Works

A step-by-step walkthrough for non-technical staff. Version 1.0 — July 2026.

The Big Picture

Customers buy from Maverick Telecom, photograph their receipt, and upload it to the app. The app reads the receipt, awards points automatically, and customers spend those points on rewards. Staff oversee it all from the admin dashboard.

Step 1 — The Customer Joins

- 1 They visit the app and tap Get Started.
- 2 They sign up with either their email and a password, or their South African mobile number.
- 3 They tick the box agreeing to the Terms and Privacy Policy (the app records this acceptance).
- 4 Email sign-ups receive a 6-digit code to confirm their address.
- 5 Every new member starts in the Starter tier.

Step 2 — The Customer Earns Points

- 1 After buying airtime, accessories, or a plan, they photograph the till slip or MTN invoice.
- 2 In the app they go to Upload Invoice and submit the photo.
- 3 The app reads the receipt automatically — no staff needed for clear receipts.
- 4 Points land in their account within about 30 seconds, based on what they bought: airtime & data at the base rate, accessories at a higher rate, plans at the highest rate.
- 5 Blurry or unusual receipts are held for staff review — this is what you clear each morning in the admin dashboard.

Step 3 — The Customer Moves Up Tiers

- As points accumulate, members progress: Starter !' Explorer !' Champion !' Elite.
- Higher tiers unlock better earning rates and rewards.
- The customer sees their tier and progress on their dashboard — nothing for staff to do; it is automatic.

Step 4 — The Customer Spends Points

- 1 They open the Rewards page and pick something they can afford.
- 2 They tap Redeem — points are deducted immediately.
- 3 Digital rewards (airtime, data, vouchers) are delivered instantly.
- 4 Physical rewards appear in the admin dashboard for staff to courier within 7 working days — this is a staff responsibility.

Step 5 — What Staff See and Do (Admin Dashboard)

- Receipts in review — approve or reject held receipts (daily task).
- Customer accounts — look up any member, adjust points, fix contact details. Every change is recorded and reversible.
- Rewards catalogue — add, price, or retire rewards.
- Offers & campaigns — create personalised promotions.
- Analytics — sign-ups, points issued, redemptions.
- Audit log — a record of every sensitive staff action, with an Undo button for contact resets.

Things Worth Knowing

- Points expire 24 months after they are earned.
- A receipt can only be claimed once — duplicates are rejected automatically.
- Redemptions cannot be cancelled by the customer once made.
- Customers can self-serve most questions via the Help & FAQ page — send them there first.
- If a customer disputes something, the History page in their account shows every point earned, spent, or reversed.

Quick Reference

- Customer app: your published URL (and custom domain once connected).
- Admin dashboard: /admin (requires an admin account).
- Customer Help & FAQ: /help Privacy: /privacy Terms: /terms
